

*Tapibel*  
Your carpet, our tradition

**COLLECTION**  
2023

# Your carpet, our tradition.

We are Tapibel, a **passionate carpet manufacturer** based in **Pelt (Belgium)**. We offer modular flooring concepts for every space. Our goal? Sparking creativity with our **innovative and sustainable carpet tile collections**. Get inspired!

# Common thread of tradition and respect

**Everything starts with the yarn and the fibres.** Every carpet and every floor covering starts as a bobbin of basic yarn, millions of yarns that are processed into one whole. The people behind Tapibel know the world of carpet like the back of their hand. We have been true **carpet masters for over fifty years**, producing both tufted and needle felt carpet. We have been passing on the knowledge of carpet production **from generation to generation** since 1970.

You can see, hear and feel **our tradition**: in the authentic factory, in the innovative products, but above all, in the people behind Tapibel. What is our common thread? Respect. Respect for each other, our products, the machines and of course, our customer. The relationships we establish with customers and employees are always **sustainable, open and honest**.

We work with machines to manufacture our carpets and carpet tiles, but **humanity is the central theme**. Our employees man the machines, fill them, adjust them and check the carpets carefully. It's all in the details. Quality and service are key, loose ends (and loose threads) don't stand a chance. Most of our tufted carpets are intended for the contract market for use in offices, hotels and public buildings. Our needle felt carpet is in demand in the event sector.

# Strong cohesion

**The yarn is processed in the tufting machine.** Whether we make a loop pile or cut pile, we always produce a strong and durable carpet. Our employees and customers also strengthen our operation. We prefer to call them "**family**" because it describes our relationship so much better. They are inextricably linked to Tapibel and have worked for decades to make the company what it is today. Each and every day. Thanks to them, we can offer our high-quality products and services.

# Flexible connection

**The carpet is finished with a strong adhesive compound** that holds and connects all the yarns or fibres together. The result is that it forms one whole and remains in good condition. **Flexibility and connection** form the basic yarn of Tapibel. We are prepared to develop and make tailored solutions to our customers. Do you need a smaller number of square metres or maybe more? Do you need a special carpet for an event? We can talk about it. We want to get to know you as a customer and build a strong bond. And we prefer to do that informally.

# Global carpet

**The result is global carpet.** We use the word "Global" because Tapibel is a Belgian carpet producer with an international character. We serve customers all over the world. We have customers as far afield as Finland to Cyprus, and from Iceland to Dubai. That means that we naturally take the traditions, customs and trends of the countries to which we export our products into account.

Our carpets and approach are a great fit for today's world because **we consider ecology and sustainability** to be of paramount importance. We are always looking for ways to make our carpet production more sustainable and ecological. Find out more about all our sustainable initiatives here. We keep our promises and make our promises achievable and tangible.

**From basic yarn to carpet**, Tapibel is a known, reliable player in the carpet industry. We continue innovating and focussing on the (the carpet of) the future without losing sight of our common values.

# Twise: sustainable initiatives for a greener planet

Our carpets and our approach fit into today's world as we are committed to ecology and sustainability. We are always looking for ways to make our carpets and carpet production more sustainable and ecological. We make this promise a reality with concrete **ecological solutions for a more sustainable modus operandi**.

**Discover Twise, Tapibel's sustainability brand.**

## Why Twise?

1. Tapibel is “wise” to produce greener carpets.
2. All sustainable solutions contain recyclable material.  
We give it a second (and third, fourth,...) life.

## The result?

A more sustainable and ecological carpet, from the yarn to the backing.

As a family business, we also think of the next generations. Thanks to these adjustments they can enjoy a greener world and greener carpet.

# Ecofuse

## The adhesive

Ecofuse is our **ecological alternative to the traditional latex adhesive** compound in both wall-to-wall carpet and carpet tiles. We replace the latex by a sustainable, post-consumer product called PVB (PolyVinyl Butyral), extracted from used car windows and laminated building glass.

### The benefits

of sustainable origin

non-toxic

future-proof

The switch to PVB results  
in a latex reduction of  
**500 tonnes!**

Scan the QR code  
and discover the PVB  
production process!

### Ecofuse in our carpets

At Tapibel, we use Ecofuse in many of our carpets. Both in broadloom and in carpet tile.

#### Precoat

The first adhesive layer between yarn and primary backing to ensure that the yarns bond firmly.

#### Secondary backing

A second adhesive layer is applied to glue the action or felt backing onto the actual carpet. This final process ensures that the broadloom carpet obtains more body and rigidity.

# Greenbase

The modified bitumen backing

Greenbase, short for modified bitumen, is a more sustainable solution for carpet tile backing. It consists of **70% recycled materials** (diverted from a waste stream of the limestone mining) which makes it less harmful to the planet. Greenbase guarantees both dimensional stability and strength in the final product.

**70%**  
**recycled**  
**materials**

# ECONYL®

## The yarns

The yarns of several of our collections are made of ECONYL®. The material is made of **100% renewable Polyamide 6 or nylon**. ECONYL® has exactly the same properties of standard nylon with a more durable edge: it can be regenerated indefinitely without loss of quality.

By reusing the materials the ECONYL® yarn contributes to a **circular economy**.

Currently, **25%** of **the yarns** we use in production are **ECONYL®**.

Compared to virgin yarns, the **CO<sub>2</sub> emissions** of ECONYL are reduced by **90%**.

## The regeneration process of ECONYL®

### 1. Rescue

We collect waste (fishing nets, dust scraps, old carpets, etc.). The materials are cleaned and sorted.

### 2. Regenerate

After a thorough regeneration and purification process, the nylon waste is returned to its original state. The raw material now consists of pellets and dispersions.

### 3. Remake

ECONYL® regenerated nylon is processed into yarns and textile.

### 4. Reimagine

With this new yarn, manufacturers such as Tapibel can get to work. We create new ECONYL® carpet collections.

# Other sustainability initiatives

## a large solar panel park on the roof

The 2500 solar panels generate 500 mW/year which represents 35% of our total electricity consumption.

## electric charging stations in the car park

We encourage employees and visitors to drive electric. The charging stations in the car park are a boost.

## simultaneous dispatch of samples and orders

We keep polluting transports to a minimum by sending as many orders as possible at the same time.

## ecological packaging for our carpets

We pack our carpets in recyclable cardboard boxes.

## a heat pump for the offices

The heat pump is powered by the solar panels and extracts heat and cold from the constant temperature of the ground. 9000 metres of ducts filled with water in underfloor heating and a climate ceiling ensure a pleasant temperature.

# Compose your ideal carpet

The possibilities are endless with carpet. There are dozens of colors available, in different sizes, with or without special finishes. Add to that the myriad of installation layouts from modular carpet tiles and you can **easily create unique floor concepts.**

Because that personal touch is so important, you can create your own carpet at Tapibel, **starting from as little as 200 m<sup>2</sup>.**

First things first, **the tile format.** Do you choose the larger square tiles (100 x 100 cm) or do you prefer the rectangular tiles of 100 x 50 cm? Want something more special in your interior? The carpet planks of 25 x 100 cm make every room an eye-catcher.

Foot comfort and good acoustics are important advantages of carpet. Do you want to optimize those two aspects? Then choose **Soundbloc** to finish the back of your carpet tile. That way you can enjoy the best that carpet has to offer.

Not found what you are looking for in the color bank of a collection? Tapibel offers the **Cobalt Colour Concept.** Read more about it on the following pages.

# Tile format

Today's working environments or hospitality interiors feature more than just one design or colour style. Interior designers prefer a more **sophisticated** and **creative carpet look** that can be combined with hard flooring specifications. A **unique signature** to each of their projects.

At Tapibel we emphasize the importance of this **modular flooring trend**. For projects **exceeding 200m<sup>2</sup>**, **special tile sizes** are made available in both Greenbase or soundblock backing.

Custom made tile/plank orders may result in an overproduction of about 10% which is mandatory to purchase. Keep this in mind when you calculate and budget your project work.

# Soundbloc

Carpet is a natural sound absorber and reduces impact noise while absorbing sound within the space. **All our qualities** have **sound absorbing properties** and **reduce impact noise**. Several collections even reach the  $\alpha_w$  0,35 threshold, reducing sound up to 50%.

Sound is an **important aspect** in many buildings like office environments, hotels, schools and educational facilities, hospitals, nursing homes and healthcare infrastructure. In all these environments, bad acoustics and intrusive sounds can damage the functionality of the environment.

Modern office workplaces should support work optimally and provide a positive ambiance to the employees. Furthermore, they should encourage staff motivation and the power of concentration. Flexible office structures combined with communicative room structures meet those demands best. Create a **productive environment** by **improving room acoustics** with our **sound-absorbing polyester felt tiles**. Add an extra layer of comfort under working feet and transform offices into pleasant working spaces.

1

Tufted **polyamide top cloth** on a **Polyester fleece primary backing** with a **precoat** finish for improved fibre bond

2

**Bitumen with glass fibre scrim secondary backing** to assure dimensional stability and improve laying properties

3

500gr **SOUNDBLOC** polyester felt backing to increase acoustic performance, durability and underfoot comfort

# Cobalt Colour Concept

## 28 Cobalt colours to create from

At Tapibel we love a creative challenge and we like to stimulate your imagination. Do you want to create a truly unique floor? Then you have to look beyond our stock collections.

Our brand new Cobalt Clour concept will surely fire up your creativity. For projects of over **400 m<sup>2</sup>**, we can customise any dazzling floor:

- Step 1:** Choose the desired design from our Cobalt Design or ECONYL® Design Collections.
- Step 2:** Choose the two Cobalt SDN colours from our 28 available options.
- Step 3:** Order your customised sample.

Artisan Tweed 64840

## minimalist timeless tweed pattern

# Artisan Tweed

Artisan Tweed has a **minimalistic yet timeless design**. The tweed pattern is inspired by timeless Chanel fabrics and popular designs in hard flooring such as woven vinyl. The ECONYL® yarn makes this collection a sustainable topper. Artisan Tweed is more subtle and fits into any timeless interior in just about any setting. Mix and match Artisan Tweed with other sustainable designs such as Shoreline and Diamond Art.

Hexagon Art 6434441

## Hexagon Art

Hexagon Art has **an original design that draws your gaze to the floor**. The stylish honeycomb pattern fits perfectly in hospitality and office environments. Hexagon Art is available in 16 different colours, ranging from organic to bright shades. Can it be a bit more? Combine the bold print with the matching uni colours from the Cobalt SDN collection. That way, you create a unique flooring concept.

Hexagon Art is designed with high-quality, durable materials that promote user well-being through good comfort underfoot and quiet acoustics.

## Oak

Oak **brings nature into any interior**. We got the idea for this collection from popular wooden floors. We incorporated the beauty of nature into a wood effect carpet plank. Yes, a plank, not a standard tile. The plank shape emphasises the natural look of the carpet. In addition to being unique, Oak is also sustainable. The collection is made from regenerated ECONYL® yarn. This unique floor concept let interior designers indulge themselves. Oak is suitable for commercial use. Thanks to its organic and warm appearance, it is a winner in public spaces. It is equally suitable for a lobby, entrance hall or town hall.

Vintage Felina 59820

## artistic patchwork printed

# Vintage

Vintage is perhaps one of Tapibel's **most original collections**. The artistic patchwork prints create a warm atmosphere. The sustainable ECONYL® carpet is originally made white and is then printed with ChromoJet technology. Dare to think outside the box and design your own unique floor concept. Each room can tell its own story using the three unique Vintage collection patterns:

### **Felina**

A criss-cross pattern that closely resembles typical patchwork

### **Firenze**

A static pattern with accents of columns from ancient Florence

### **Ferrara**

A calmer weave pattern with bright color combinations

The three patterns are available in six colored prints that you can mix and match.
